

TRITECH SOFTWARE SYSTEMS ANNOUNCES ACQUISITION OF LEADING PUBLIC SAFETY SOLUTION PROVIDER, VISIONAIR INC.

Partnership creates the largest and most diverse public safety software company in North America

SAN DIEGO, CA (Sept. 19, 2011) – TriTech Software Systems, a leading provider of Public Safety and Medical Transportation software solutions, today announced its acquisition of VisionAIR, a privately held company that specializes in providing mission-critical Computer-Aided Dispatch, Law and Fire-EMS Records Management, Mobile, Jail Management,, Civil Processing and multi-agency data sharing solutions to public safety agencies primarily for the mid-tier market.

The partnership strengthens TriTech's market share leadership by adding more than 500 VisionAIR clients to the TriTech family, bringing the total of agencies served to more than 2,500 agencies worldwide. With expanded presence and more than 300 employees dedicated to public safety, both companies can leverage their leadership, resources, and capabilities to support the increasing demands placed on public safety services through consolidation, regionalization, information sharing, limited budgets, and the convergence of technology.

"Public safety agencies in North American are facing challenging times. They increasingly look to safer, more resilient solutions from companies who can exhibit leadership, longevity and stability. The partnership between VisionAIR and TriTech is about bringing together two strong leaders in different segments of the market to create the largest, most stable company in our market," said Chris Maloney, President and Chief Executive Officer of TriTech Software Systems. "Today, we significantly strengthened both companies, not only in terms of our market presence, personnel and leadership, but having scalable solutions to support any type (Fire, Law and EMS) or size public safety agency."

VisionAIR includes a 20-plus year track record of client success and joins the growing TriTech product family. VisionAIR is a strong competitor in the medium-size public safety market. When combined with TriTech's large tier and small tier solutions, the company can now provide solutions to any agency in the market. VisionAIR also brings new products to the TriTech family that complement the suites of the sister organizations.

Business continuity underlines the new partnership, as VisionAIR's senior leadership will remain unchanged. The executive team, including Mike Lyons, Gary Bunyard, and Scott MacDonald, will continue to manage VisionAIR's day-to-day operations and maintain their focus on delivering high quality products and services.

“The VisionAIR team is excited to be partnering with TriTech Software Systems. The two companies share the same values and long-term commitment to customer success. We succeed when our clients succeed so providing superior services, delivering innovative technology and building long-term partnerships are mission critical. Our new partnership strengthens VisionAIR’s resources and capabilities to meet their growing needs and challenges,” said Mike Lyons, President and CEO, VisionAIR Inc.

With TriTech’s headquarters in San Diego, CA and offices already in Decorah IA and North Grafton MA, the addition of VisionAIR’s office in North Carolina, expands its presence on the east coast – The combined company is one of the largest public safety solution providers worldwide with more than 2,500 installations and more than 3,000 agencies relying TriTech’s technology around the globe.

###
